Apziva

14.03.2024

To Whom It May Concern:

It is with great pleasure that I write this letter in recommendation of Mohammed Odeh For six months, Mohammed Odeh undertook the Apziva AI Residency program from 1st September 2023 to 14 March 2024, and worked on several industry projects in the field of Machine Learning and Artificial Intelligence under the close guidance of his mentor Sandeep Sricharan Mukku in coordination with his advisor Zeynep Pelin Demir.

During the program, Mohammed successfully completed the following projects. Happiness Insight Project, aiming to predict customer satisfaction via survey data, Call Success ML Advisor Project, aiming to predict customer subscriptions of a financial product,Talents Insight Tool Project, aiming to rank candidate profiles using natural language processing, FlipScan-AI Project, aiming to detect page flipping with computer vision to help people with eyesight problems, Stock Forecaster Project, aiming to predict and recommend company stocks via time-series data.

Considering the challenging nature of projects Mohammed undertook during the program, his exemplary work, motivation, dedication, and the feedback I received from his mentor and advisor, he consistently demonstrated an ability to rise to any challenge during the period we worked with him, and I believe Mohammed would be an excellent addition to any team.

To conclude, I would like to restate my strong recommendation for Mohammed Odeh. Should you have any questions, please do not hesitate to contact me and let me know if I can provide further information. I will be happy to answer any questions you may have.
Sincerely,

Semih YAĞCIOĞLU
Director of Artificial Intelligence
